**Average Total Academic Cost** represents the sum of all statutory, designated (including differential tuition), and board-authorized tuition, along with mandatory fees (including college and course fees). It is derived from actual fee bills for resident undergraduate students enrolled in 15 semester credit hours in the fall and spring semesters.

**Average Net Academic Cost** for all full-time students is derived by subtracting the total need-based grant aid from the total academic costs of all students and then dividing by the total number of students.

As an example: Of all full-time resident undergraduates at UT Arlington, 49.5% received at least one dollar in need-based grant and scholarship aid.

On average, this aid covered 71.5% of total academic costs for this subgroup.

When students take out student loans, they are investing in their future. It is important to view loan debt in context with what the future return on investment (ROI) will be. One way to gauge ROI is through earnings outcomes from post-graduation employment (highlights on the next two pages).

The average loan debt for UT baccalaureates in the most recent graduating cohort was \$20,788.

For all Texas public universities, the average was \$24,301. The national average for public universities was \$27,539.

Earnings data reflect data for those employed full-time for a full year in the state of Texas. For baccalaureate graduates, the median debt is estimated for those who initially enrolled at the institution as first-time-in-college (FTIC) students. For UTRGV, 1st-Year is based on the 2017 graduating cohort; 5th-Year and 10th-Year are based on five graduating cohorts from the combination of UTB and UTPA. Student loan debt for health-related institutions is not included because of the limited number of first-time-in-college students at these institutions, which only admit students who have completed college core curriculum elsewhere. UTSWMC does not offer baccalaureate degrees.

## Post-Graduation Earnings for Medical School Graduates Found Working in Texas

as of 04-01-2022

Institution	5th-Yr Median Wage	10th-Yr Median Wage	Median Student Loan Debt	% w/ Loan Debt

UT System	\$144,295	\$285,305	\$148,027	74%
Nation			\$200,000	71%

Median student loan debt is the median of the student loan debt that borrowers owed at the time they earned their degree. The figures here only include debt incurred at a specific medical school.

National context for medical student loan debt: 70.8% of graduates had medical school debt. The median medical school debt reported was \$200,000 (from the AAMC Summary of the 2020 Graduate Questionnaire).

Medical school graduates cannot practice without completing at least one year of residency. The length of residency is based on specialty, and most are between 3 and 7 years. The length of residency and specialty has a direct impact on wages. 1st-Year wages are not displayed because all medical school graduates are in residency programs at this time.

## Inter-Generational Mobility: Percent of Students\* with Earnings in the Top 3 Income Quintiles 5 Years After Exiting

*Students Exiting Between 2010 and 2014*

last update April 2021

\*The population is dependent, undergraduate students who 1) filed a FAFSA/TASFA and 2) were found in the TWC UI data. Parental household income is measured while students were attending college (earliest year available from the FADS).

Group	Parental Household Income Quintile				
	Q1	Q2	Q3	Q4	Q5
All Completers	69%	71%	74%	76%	77%
STEM Completers	73%	74%	77%	78%	79%
African American Completers	68%	67%	73%	74%	69%
Hispanic Completers	67%	70%	73%	74%	75%
Female Completers	66%	69%	72%	75%	75%
Non-Completers	31%	33%	39%	41%	47%

*How do I read these charts?* Looking at the first chart, first row and column: 69% of Completers whose parental income was in the lowest quintile (Q1) had earnings that put them in the third quintile or above when compared to the income of their peers. The student income quintiles are calculated based on the student cohorts (the number of years after graduation).

\* A portion of "State" expenditures includes an institution's hospital patient income that is re-invested in the research enterprise.

Beginning with FY 2021, OIRA will report the combined research expenditures for UTT and UTHSCT under UTT. For the calculation of 5-yr % Change for UTT, the research expenditures for both campuses will also be combined in past years.

An additional metric of patient care: UT physician practices provided care to 2,727,469 **unique patients** in FY 2021. The number of unique patients represents the number of unique medical records with at least one active visit within the year. According to Fitch Ratings, the significance is that this measures the number of unique patients accessing—as well as remaining in—the healthcare organization. This is an indicator of access, demand, and market presence.

For FY 2021, **43.7%** of UT System revenues comes from hospital, clinic, and professional fees related to patient care.

Hospitals and clinics account for **35.0%** of total expenses.
