

Update – May 17, 2010

On Thursday, May 13, a special advisory committee of the U. T. System Board of Regents held a public comment session on the two conceptual master plans presented by Cooper, Robertson, & Partners in June 2009. The webcast of the public comment session may be viewed at <http://www.utsystem.edu/bor/meetings/webcasts.htm>. Individuals also may submit written comments on the conceptual master plans to BrackTract@utsystem.edu.

The Board has taken no action on the plans, but has established a special advisory committee of three members of the Board to review the plans and to study and review options. In December 2009, on recommendation of the special advisory committee, the Board voted to retain the Brackenridge Field Laboratory on the Brackenridge Tract.

The final report of Cooper, Robertson & Partners is at <http://www.utsystem.edu/reo/brackenridge/ProjectReport.html>. A hard copy of the report is available at the Texas State Library and the Austin History Center. The Brackenridge Tract Task Force report, issued in October 2007, is available at <http://www.utsystem.edu/reo/Brackenridge/report.pdf>.
