Grand Totals:	1,065		938		941		852		738	

Sources of data: Count of licensees:

UT System OIR compilation of data from the Texas State Board of Medical Examiners

Count of medical degrees conferred:

"Medical Degrees Conferred Fiscal Years 1990–91 to 1994–95", Texas Higher Education Coordinating Board

Notes: ¹ Licensing requires graduates of U.S. medical schools to have one year of experience after graduation; graduates of foreign medical schools must have 3 years of experience before becoming licensed.

² For Texas medical schools, "%" indicates percent of graduating class having a Texas mailing address and licensed to practice medicine in Texas as of December 1996.

Since the length of residency programs ranges from 3–8 years, depending on specialty, the more recently graduated, the more likely that the licensee is participating in a residency program. Likewise, the more recent Texas graduate, licensed in Texas but without an in-state mailing address, is likely to have a residency assignment outside the state.
