

Please join Brian Fuller as he discusses the implications for higher education from the Federal Information Security Management Act (FISMA). In this session, Brian will discuss the core components of FISMA, risk-based controls designed to mitigate security attacks, and discuss the National Institute of Standards and Technology (NIST) information security standards.

Learning objectives:

- Understand FISMA’s core components and NIST’s role and requirements
- What does FISMA compliant really mean?
- Exposure to NIST’s Risk Management Framework
- Key success criteria for each step in the Risk Management Framework

Austin webinar attendees: The presentation will be in ASH 202. Feel free to join us there.

CPE credit: CPE credit will be available for participants attending the live session
