Average Total Academic Cost represents the sum of all statutory, designated (including differential tuition), and board-authorized tuition, along with mandatory fees (including college and course fees). It is derived from actual fee bills for resident undergraduate students enrolled in 15 semester credit hours in the fall and spring semesters.

Average Net Academic Cost for all full-time students is derived by subtracting the total need-based grant aid from the total academic costs of all students and then dividing by the total number of students.

As an example: Of all full-time resident undergraduates at UT Arlington, 51.5% received at least one dollar in need-based grant and scholarship aid. On average, this aid covered 69.9% of total academic costs for this subgroup.

When students take out student loans, they are investing in their future. It is important to view loan debt in context with what the future return on investment (ROI) will be. One way to gauge ROI is through earnings outcomes from post-graduation employment (highlights on the following pages).

The average loan debt for UT baccalaureates in the most recent graduating cohort was $20,776.

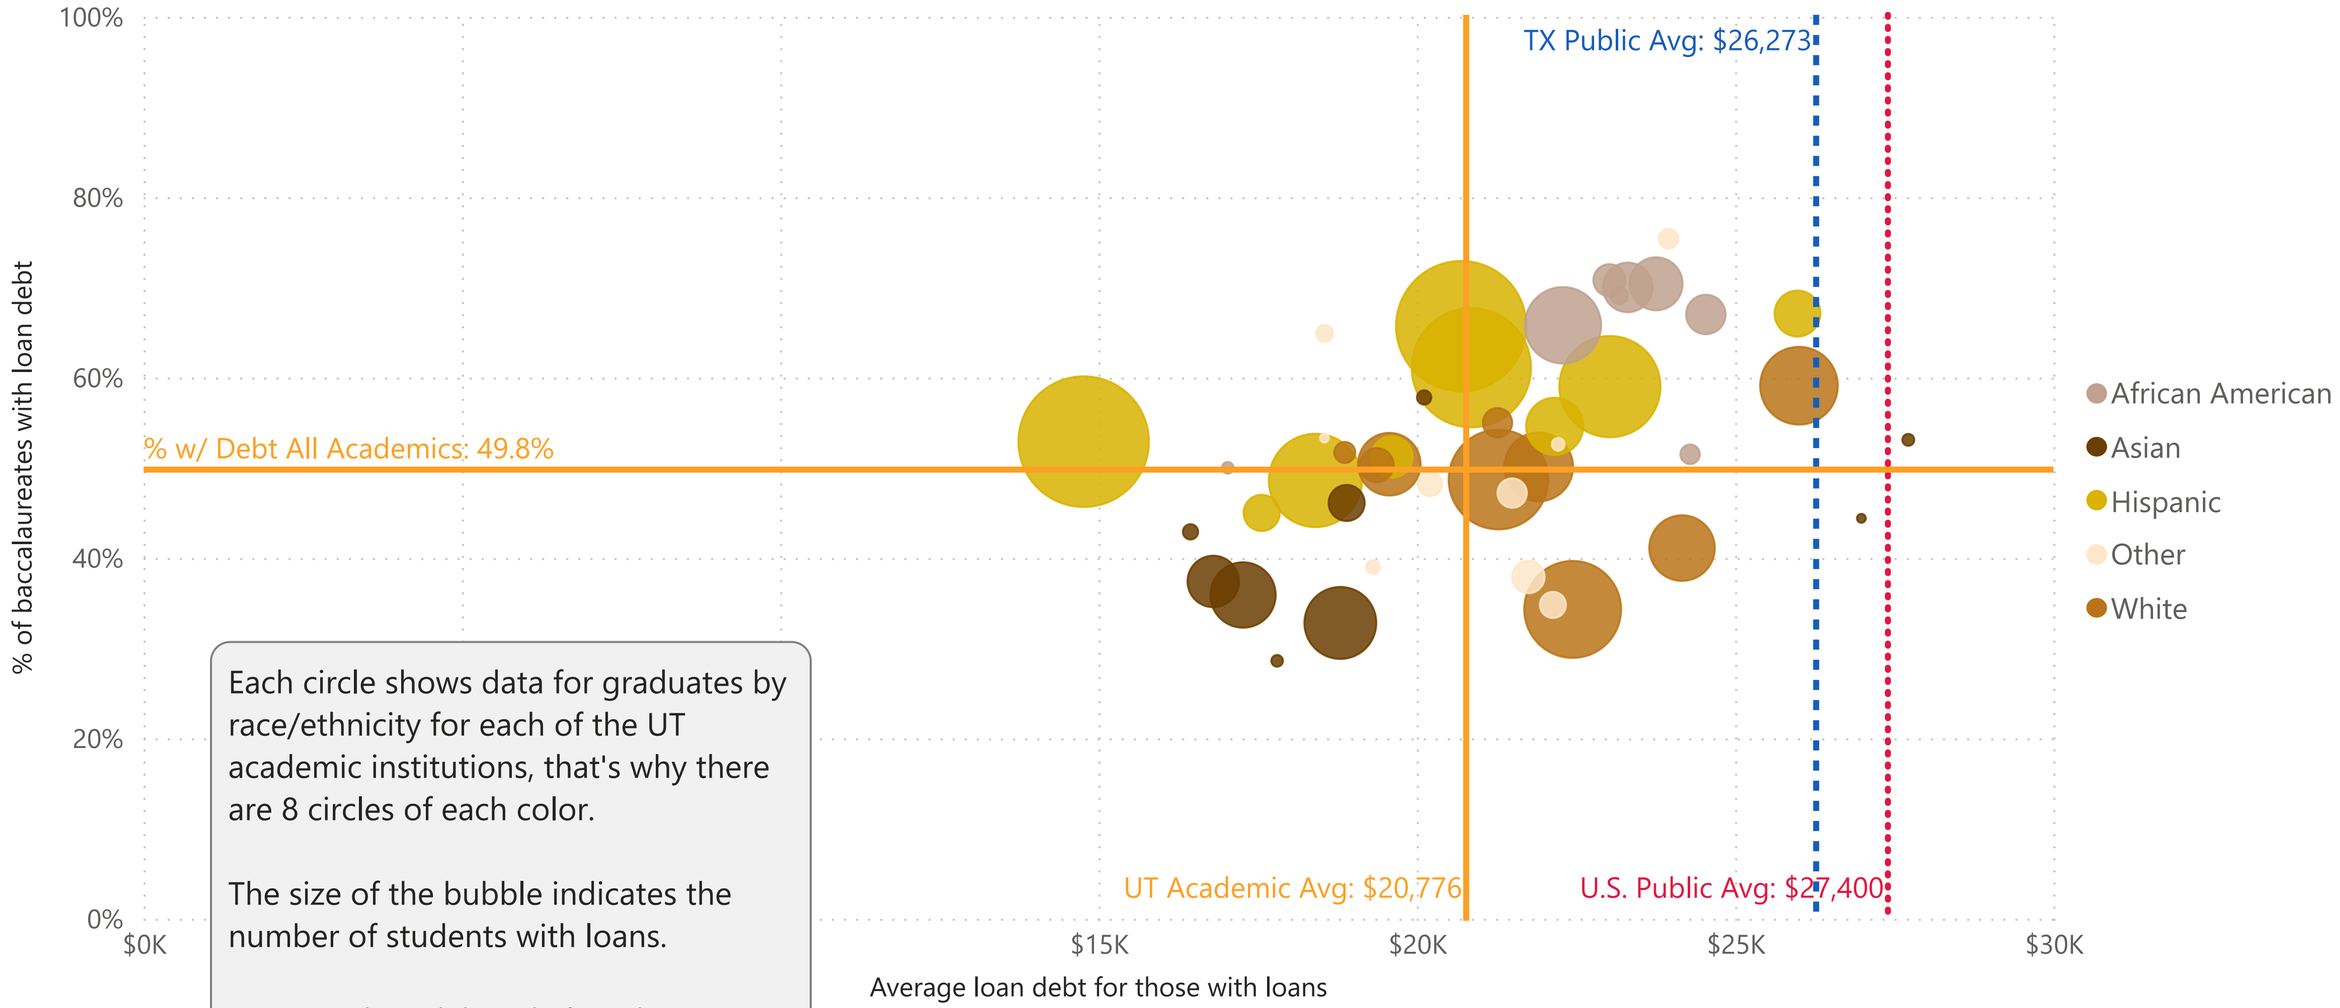

For all Texas public universities, the average was $26,273.

The national average for public universities was $27,400.

as of 10-11-2023

Each circle shows data for graduates by race/ethnicity for each of the UT academic institutions, that's why there are 8 circles of each color.

The size of the bubble indicates the number of students with loans.

Most student debt is below the state average for public 4-year institutions. All are below the national average.

Earnings data reflect data for graduates employed full-time for a full year in the State of Texas. For baccalaureate graduates, the median debt is estimated for those who initially enrolled at the institution as first-time-in-college (FTIC) students. For UTRGV, 1st-Year is based on the 2017 graduating cohort; 5th-Year and 10th-Year are based on five graduating cohorts from the combination of UTB and UTPA. Student loan debt for health-related institutions is not included because of the limited number of first-time-in-college students at these institutions, which only admit students who have completed college core curriculum elsewhere. Historic wage data is not currently available for Stephen F. Austin State University graduates. UTSWMC does not offer baccalaureate degrees.

Post-Graduation Earnings for Medical School Graduates Found Working in Texas

as of 05-10-2023

Institution	5th-Yr Median Wage	10th-Yr Median Wage	Median Student Loan Debt	% w/ Loan Debt
UTSWMC	$128,565	$296,856	$141,240	70%

UT System	$152,713	$298,945	$153,721	71%
Nation			$200,000	71%

Median student loan debt is the median of the student loan debt that borrowers owed at the time they earned their degree. The figures here only include debt incurred at a specific medical school.

National context for medical student loan debt: 70.5% of graduates had medical school debt. The median medical school debt reported was $200,000 (from the Association of American Medical Colleges (AAMC) Summary of the 2021 Graduate Questionnaire).

Medical school graduates cannot practice without completing at least one year of residency. The length of residency is based on specialty, and most are between 3 and 7 years. The length of residency and specialty has a direct impact on wages. 1st-Year wages are not displayed because all medical school graduates are in residency programs at this time.

Intergenerational Mobility: Percent of Students* with Earnings in the Top 3 Income Quintiles 5 Years After Exiting

as of 05-10-2023

Students Exiting Between 2012 and 2016

*The population is dependent, undergraduate students who 1) filed a FAFSA/TASFA and 2) were found in the TWC UI data. Parental household income is measured while students are attending college (earliest year available from the FADS).

	Parental Household Income Quintile				
Group	Q1	Q2	Q3	Q4	Q5
All Completers	69%	70%	73%	75%	76%
STEM Completers	74%	73%	77%	78%	79%
African American Completers	67%	66%	72%	72%	70%
Hispanic Completers	67%	69%	72%	74%	74%
Female Completers	66%	68%	71%	74%	75%
Non-Completers	31%	34%	38%	41%	46%

How do I read these charts? Looking at the first chart, first row and column: 69% of Completers whose parental income was in the lowest quintile (Q1) had earnings that put them in the third quintile or above when compared to the income of their peers. The student income quintiles are calculated in relation to the population* of students 5 years after exiting the UT System.

Note: Historic TWC UI data is not currently available for Stephen F. Austin State University.

* A portion of "State" expenditures includes an institution's hospital patient income that is re-invested in the research enterprise.

Beginning with FY 2021, OIRA reports the combined research expenditures for UTT and UTHSCT under UTT. For the calculation of 5-yr % Change for UTT, the research expenditures for both campuses are also combined for past years.

An additional metric of patient care: UT physician practices provided care to **2,441,643 unique patients** in FY 2022. The number of unique patients represents the number of unique medical records with at least one active visit within the year. According to Fitch Ratings, the significance is that this measures the number of unique patients accessing—as well as remaining in—the healthcare organization. This is an indicator of access, demand, and market presence.

For FY 2022, **45.3%** of UT System revenues comes from hospital, clinic, and professional fees related to patient care.

Hospitals and clinics account for **36.4%** of total expenses.
