- Beginning with *SmartBook* 2025, data for UT San Antonio and UT Health Science Center San Antonio are combined and reported under UT San Antonio in the academic section. Data for UT Tyler and UT Health Science Center Tyler have been combined and reported under UT Tyler since *SmartBook* 2022. In both cases, historical data have been consolidated as needed to support the calculation of change.
- UT Brownsville and UT Pan American campuses closed at the end of AY 2014-15.
- UT Rio Grande Valley began enrolling students in Fall 2015.
- UT Austin Dell Medical School and UT Rio Grande Valley School of Medicine began enrolling students in Fall 2016.

**Average Total Academic Cost** represents the sum of all statutory, designated (including differential tuition), and board-authorized tuition, along with mandatory fees (including college and course fees). It is derived from actual fee bills for resident undergraduate students enrolled in 15 semester credit hours in the fall and spring semesters.

**Average Net Academic Cost** for all full-time students is derived by subtracting the total need-based grant aid from the total academic costs of all students and then dividing by the total number of students.

*As an example: Of all full-time resident undergraduates at UT Arlington, 60.0% received at least one dollar in need-based grant and scholarship aid.*

*On average, this aid covered 83.8% of total academic costs for this subgroup.*

Retention is calculated as the percentage of first-time, full-time, degree-seeking undergraduates who are enrolled in at least 12 semester credit hours (SCH) in the fall semester and are still enrolled at the same initial institution one fall semester later. Retention information may differ from what is reported by the Texas Higher Education Coordinating Board and UT Institutions. The UT System utilizes an internal data warehouse to track student progress over time. Data for UTSA and UTHSCSA are combined and reported under UTSA in the academic section.

When students take out student loans, they are investing in their future. It is important to view loan debt in context with what the future return on investment (ROI) will be. One way to gauge ROI is through earnings outcomes from post-graduation employment (highlights on the following pages). Data for UTSA and UTHSCSA are combined and reported under UTSA in the academic section.

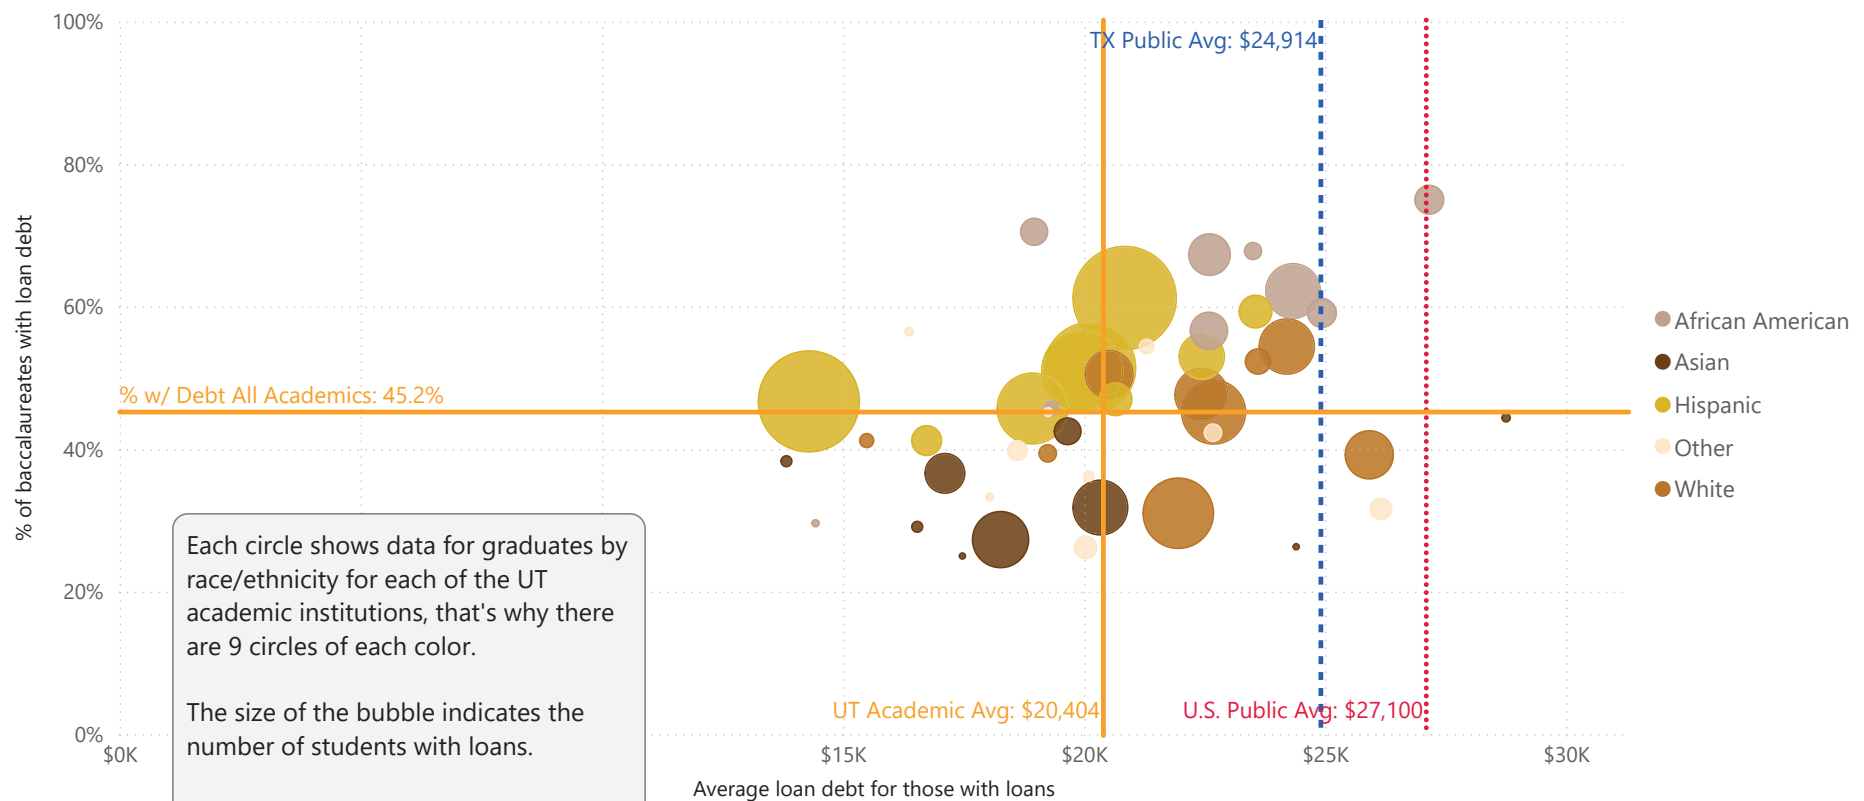

The average loan debt for UT baccalaureates in the most recent graduating cohort was \$20,404.

For all Texas public universities, the average was \$24,914. The national average for public universities was \$27,100.

Earnings data reflect data for graduates employed full-time for a full year in the State of Texas. The median debt is estimated for those graduates who initially enrolled as first-time-in-college (FTIC) students and who took out loans. For UTRGV, 5th-Year wage outcomes are based, in part, on graduating cohorts from the former UTB and UTPA institutions; all 10th-Year outcomes reflect combined data from UTB and UTPA. Student loan debt for health-related institutions is not included because of the limited number of first-time-in-college students at these institutions, which only admit students who have completed college core curriculum elsewhere. UTSWMC does not offer baccalaureate degrees. UTHSCSA and UTSA earnings data are combined under UTSA.

*UTHSCSA has been merged with UTSA. Earnings data for the new medical schools affiliated with UT Austin, UTRGV, and UT Tyler will be reported in future releases as data become available.*

Median student loan debt is the median of the student loan debt that borrowers owed at the time they earned their degree. The figures here only include debt incurred at a specific medical school.

National context for medical student loan debt: 68% of graduates had medical school debt. The median medical school debt reported was \$200,000 (from the Association of American Medical Colleges (AAMC) Summary of the 2023 Graduation Questionnaire).

Medical school graduates cannot practice without completing at least one year of residency. The length of residency is based on specialty, and most are between 3 and 7 years. The length of residency and specialty has a direct impact on wages. 1st-Year wages are not displayed because all medical school graduates are in residency programs at this time.

\* A portion of "State" expenditures includes an institution's hospital patient income that is re-invested in the research enterprise.

Beginning in FY 2021, OIRA reports the combined research expenditures for UTT and UTHSCT under UTT. Starting in FY 2024, OIRA also reports the combined research expenditures for UTSA and UTHSCSA under UTSA. For the calculation of 5-yr % Change for UTT and UTSA, the research expenditures for these campuses are combined for past years.

An additional metric of patient care: UT physician practices provided care to **2,515,502 unique patients** in FY 2024. The number of unique patients represents the number of unique medical records with at least one active visit within the year. According to Fitch Ratings, the significance is that this measures the number of unique patients accessing—as well as remaining in—the healthcare organization. This is an indicator of access, demand, and market presence.

For FY 2025, **45.5%** of UT System revenues comes from hospital, clinic, and professional fees related to patient care.

Hospitals and clinics account for **38.1%** of total expenses.
