87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

AGENCY BACKGROUND

The University of Texas Health Science Center at Tyler (UTHSCT) was established by the Legislature in 1947 and joined The University of Texas System in 1977 as a health-related institution. UTHSCT is the only academic medical center in Northeast Texas and serves a region the size of West Virginia, with a population of over 1.3 million Texans.

UTHSCT's mission is to serve Northeast Texas and beyond through excellent patient care and community health, comprehensive education, and innovative research. It has maintained a portfolio of clinical and non-clinical operations, an acute care hospital and inpatient behavioral health services, a network of regional outpatient clinics, a growing faculty physician practice, several residency programs, schools of biomedical research and community and rural health, and a research enterprise. In order to gain economies of scale in rural markets, UTHSCT's clinical operations now work in concert with 9 other regional hospitals to create UT Health East Texas. UTHSCT's hospital remains state owned and operates with no change in its mission. The ultimate aim of this partnership is to improve the experience of health care in Northeast Texas, improve the health of the population in this region, and reduce the per capita costs of health care.

Mission Highlights

Patient Care: in 2018, UTHSCT formed a public-private partnership to establish UT Health East Texas, an integrated health system with 10 hospitals, 50-plus clinics, 54 ambulances and 4 helicopters, and a Level I Trauma Center. The new health system sees more than 700,000 outpatient visits annually. The UTHSCT signature programs in primary care, pulmonary and chest disease, mental health, and cancer are centers of excellence both in Texas and globally and are now available to the entire region of Northeast Texas.

Education: UTHSCT's graduate medical education (GME) residency programs in family medicine, rural family medicine, internal medicine, occupational medicine, psychiatry, and general surgery attract the state's and nation's top medical school graduates. In response to the Legislature's call to increase GME opportunities across the state, UTHSCT is in the process of expanding GME programs by approximately 300% over five years, and plans to open over 200 new residency slots with the UT Health East Texas system. Its psychology internship program is highly sought after by doctoral students throughout the country. The institution serves as a clinical rotation site for nursing, medical, and allied health students from across the State. UTHSCT's School of Medical Biological Sciences offers a Master of Science in Biotechnology degree program that is focused on meeting the workforce needs of the state's growing biotechnology industry. UTHSCT's School of Community & Rural Health offers a Public Health Master's Degree Program with a specialized focus in training the workforce to meet the public health needs in rural Texas. UTHSCT's newest degree program, Master of Healthcare Administration, matriculated students for the first time in the fall of 2019.

Research: UTHSCT's scientific discoveries improve the quality of life for all Texans. Through the efforts of the UTHSCT research team, the research grant awards for FY 2018 totaled \$16,025,926 and in FY2019 totaled \$17,593,873. The campus consistently competes with Harvard, Johns Hopkins, other UT System institutions, and other top medical research hospitals for funding, particularly in the research of chest diseases, cancer, and infectious diseases. Despite increasing competitiveness for extramural research funding, the majority of researchers at UTHSCT have federal grant support for their research, and half of all research investigators are multi-grant funded through the National Institutes of Health (NIH).

785 The University of Texas Health Science Center at Tyler

State & Federal Designations

The state and federal governments have recognized UTHSCT's expertise and importance through multiple designations, including:

State Chest Hospital: Texas Health and Safety Code Section 74.603 designates UTHSCT as the State Chest Hospital. UTHSCT is the primary facility in this state to: (1) conduct research related to respiratory diseases; (2) develop diagnostic and treatment techniques and procedures for respiratory diseases; (3) provide training and teaching programs; and (4) provide diagnosis and treatment of inpatients and outpatients with respiratory disease. UTHSCT continues to provide clinical leadership and medical services to patients at the Department of State Health Services' Texas Center for Infectious Diseases in San Antonio.

Public Health Lab of East Texas: This partnership between UTHSCT, the Texas Department of State Health Services, and the Centers for Disease Control and Prevention is part of the United States Laboratory Response Network. PHLET has proven vital during response to the ongoing COVID-19 pandemic by serving as the first testing site in the region and filling the need for rapid testing for acute needs throughout the duration of the response.

Southwest Center for Agricultural Health, Injury Prevention, and Education: Since 1995, UTHSCT has been home to a federally funded center with research, prevention, intervention, education, and outreach efforts designed to reduce occupational injuries and diseases among agricultural workers and their families in five states, including Texas.

Other Designations: In addition to those described above, UTHSCT is also home to the East Texas Center for Rural Geriatric Studies, the Center for Pulmonary & Infectious Disease Control, and the Heartland National Tuberculosis Center.

REGIONAL CHALLENGES

UT Health Science Center at Tyler is vital to the health and well-being of Northeast Texas. To understand the institution's important mission in the region, it is important to note the region's unique challenges:

Northeast Texas is the unhealthiest region of the State of Texas. The 1.3 million people who live here face more severe primary care and mental health provider shortages than other regions of the State, are at greater risk of early death than the statewide average, and have a suicide rate that is 43% higher than the statewide average. For each of the five leading causes of death in the U.S. (heart disease, cancer, stroke, chronic lower respiratory diseases, and unintentional injury), Northeast Texas experiences higher rates of mortality. If Northeast Texas were a state, it would rank 49th in heart disease mortality, 47th in chronic lower respiratory disease mortality, and 51st in stroke mortality. Northeast Texas as a state would rank 45th in overall mortality, while Texas ranks 31st.

Key statistics about the region include the following:

- Medically Underserved Areas/Populations: All but two counties in Northeast Texas are either wholly or partially designated as medically underserved areas/populations.
- Primary Care Workforce Shortages: A significant number of the counties in Northeast Texas have shortages in primary care providers. In some communities, there are no primary care providers.

785 The University of Texas Health Science Center at Tyler

- **Mental Health Workforce Shortages:** An estimated 85,000 people in Northeast Texas have a serious mental illness, and approximately 113,000 need substance abuse treatment; yet, in nearly every community, there is a critical shortage of mental health professionals. In some communities, the ratio of people to mental health providers is 25,000:1, seven times the average for Texas.
- **Cancer Incidence & Mortality:** Northeast Texas has higher age-adjusted invasive cancer incidence rates than the statewide average, and the mortality rates for both men and women are higher than the statewide average.
- **Health Outcomes & Health Factors:** Over half of the counties in Northeast Texas are in the bottom 25% of all Texas counties in health outcomes, and over half are in the bottom 25% in health factors.

MEETING THE NEEDS OF TEXAS

UT Health Science Center at Tyler exists to solve problems, and the institution's leadership takes seriously its charge to address the most pressing needs of Texas. The institution has developed programs specifically aimed at meeting the needs identified by the Legislature as State priorities, including:

Mental Health

Thanks to the strong support of the Legislature and various state agencies, UTHSCT is the leader in mental health services and training in East Texas. Non-formula support for mental health programs at UTHSCT has equipped the institution to become the largest provider of child and adolescent mental health services in the region. In both 2018 and 2019, UTHSCT providers conducted over 10,000 mental health patient visits. Even amidst challenges brought on by COVID-19, UTHSCT providers are on pace to eclipse that number in 2020. As faculty and staff counts grow thanks to new state funding, the institution's ability to serve the mental health needs of East Texas will continue to increase.

UTHSCT is also proud to serve as the regional leader on the Texas Child Mental Healthcare Consortium, created by the 86th Legislature, which will further expand the ability of UTHSCT to share expertise and care for vulnerable patients throughout East Texas.

In partnership with the Department of State Health Services (DSHS), UTHSCT continues to work to improve mental health services in Texas. In March 2013, UTHSCT opened a 30-bed subacute mental health unit that is providing care to mentally ill patients previously residing in a state mental health hospital. This addition of beds has helped to alleviate congestion in the state's mental health system, allowing DSHS to open state mental health hospital capacity. In September 2014, UTHSCT opened a 14-bed acute mental health unit to provide additional beds to the State to better care for patients in acute mental illness crisis. UTHSCT also operates a 10-bed geriatric psychiatry unit to treat elderly patients with mental illness and opened a second 24-bed adult acute psychiatry unit in 2020. These 78 mental health beds support not only the clinical care needs of patients with mental illness but also support its psychiatry residency and psychology internship workforce training programs.

Women & Children's Health

UTHSCT participates in the Healthy Texas Women and family planning programs through DSHS. The institution also has programs in partnership with DSHS and DFPS to reduce infant mortality, help at-risk parents keep their babies and children healthy, and reduce the number of abuse-related injuries to children.

Graduate Medical Education

UTHSCT is making a difference in the most underserved areas of the State. UTHSCT is the sponsoring institution for several accredited residency programs, including family medicine, occupational health, internal medicine, rural family medicine, general psychiatry, rural psychiatry, general surgery, and psychology internship. It is

Administrator's Statement

9/16/2020 2:00:06PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

notable that approximately 73 percent of the family medicine residents trained at UTHSCT remain in Texas, and over half of those stay in rural Texas. The psychiatry GME program includes rotations at Rusk and Terrell State Hospitals. Thanks to the establishment of UT Health East Texas, UTHSCT is rapidly developing new residency programs and hopes to sponsor over 200 new resident positions by 2025 in multiple needed specialty areas, such as primary care, pediatrics, OB/GYN, and surgery.

School of Community & Rural Health

A critical component of addressing the serious challenges in communities like Northeast Texas is developing a workforce that is skilled in public health. Nationally, the public health workforce shortage has been worsening since 1980.

To address the significant workforce shortages in public health, particularly in rural Texas, UTHSCT established the School of Community and Rural Health in February 2016. This School offers a Master of Public Health (MPH) degree program that is the only such program in the State of Texas focused on meeting the needs of rural Texans. It is designed to be accessible and affordable to students in underserved areas of the State and is an applied approach to public health.

A Master's Degree of Healthcare Administration (MHA) program has also been established and matriculated its first class of students in 2019. The MHA program is flexible in design and targeted at healthcare professionals in any stage of their career. Students gain greater leadership and management capabilities tailored to the rapidly changing healthcare industry.

School of Medical Biological Sciences

The UTHSCT School of Medical Biological Sciences offers a Master of Science in Biotechnology degree program. The program curriculum prepares graduates for professions in biotechnology, pharmaceutical development, doctoral programs, medical school, and related scientific fields.

BACKGROUND CHECKS

Consistent with Texas Government Code Section 411.094 and Texas Education Code Section 51.215, UTHSCT's policy is to conduct criminal history record background checks on all applicants who are finalists for positions, employees who are promoted, individuals wishing to volunteer, students who are assigned to patient care, and all non-employees who conduct business at the institution. Upon conclusion of the review of the criminal background check, the chief of police and human resources department determine an applicant's suitability for employment.

SELECTED UPDATES ON 2020-21 BIENNIUM FUNDING

Mental Health Workforce Expansion

There is a critical shortage of mental health professionals in Texas, particularly in rural Texas. In some communities in Northeast Texas, the ratio of mental health professionals to patients is 25,000:1, seven times worse than the state average.

With an exceptional item funded by the 84th Texas Legislature, UTHSCT enacted the region's first mental health workforce training program. These funds have been used to recruit faculty, including child and adolescent mental health faculty, and establish a psychiatric residency program. Now in its 4th year and accredited by the Accreditation Council for Graduate Medical Education, this program currently includes 24 psychiatry residents, and is now operating at full capacity. The program includes rotations at UTHSCT, local mental health authorities, and Rusk and Terrell State Hospitals. In addition, UTHSCT has tripled the number of clinical psychology

785 The University of Texas Health Science Center at Tyler

internship positions with rotations to Rusk State Hospital. This funding was also instrumental in the establishment of a psychology training program which initially trained ten psychology interns and one psychology post-doctoral fellow.

The 86th Legislature dedicated additional funding toward mental health workforce training at UTHSCT, which has been utilized to expand the number of psychology post-doctoral fellows trained at the institution to six, and develop a program focused on training mental health professionals to better treat children who have suffered from abuse. As a result, 145 mental health professionals have received such training, a number which will grow rapidly as program development progresses.

The funding in strategy D.1.2, Mental Health Training Programs, is identified in the Policy Letter as an exception to the baseline request limitation. UTHSCT appreciates the State's elected leadership exempting this critical funding from required baseline limitations.

IMPACT TO AGENCY PERFORMANCE OF DIRECTED 5% BUDGET REDUCTIONS

UTHSCT's non-formula funding items include Mental Health Training Programs, Family Medicine Residency Training, Support for Indigent Care, and Institutional Enhancement. The recent Policy Letter indicated that funding for behavioral health programs and debt service are exempted from the reduction of the baseline request. UTHSCT is grateful that these items are exempt from the baseline reduction and recognizes the unique challenges Texas faces from COVID-19 related revenue losses. However, any reduction to general revenue funded items will cause a change in services funded by those items.

UTHSCT's Family Medicine Residency Training program was established in 1985 and has graduated 202 residents. Over 70 percent of the Family Medicine residents trained at UTHSCT stay in Texas, and over half of those remain in rural Texas. The federal Balanced Budget Act of 1997 placed a cap on the number of residents at UTHSCT for which the Centers of Medicare and Medicaid (CMS) would cover at 16.35 (13.58 for Family Medicine residents), and UTHSCT has covered the residents over that cap from its local funds. UTHSCT is grateful for the non-formula funding for the Residency Training Program (currently an annual amount of \$771,446). However, any additional reductions to the Family Medicine Residency Training non-formula item could impact the number of residents the institution is able to accept, train, and graduate, and would impact underserved rural communities the hardest.

UTHSCT has a policy to provide financial assistance to qualified patients who meet certain eligibility requirements, who have no other means to meet their UTHSCT hospital and/or physician responsibilities, and who have completed an application for this assistance. Non-formula funding is received for Support for Indigent Care in the amount of \$935,156 annually. This amount does not cover all patients who apply for this program, so UTHSCT attempts to help those patients find alternative funding sources. Any reduction to this state funding amount could negatively impact patients who are unable to meet their financial responsibilities for the health care they receive at UTHSCT.

Lastly, the non-formula funding for Institutional Enhancement was established by the 79th legislature in 1999 for the 2000-2001 biennium for all State supported higher education institutions. The annual amount for this funding is \$1,026,661, and a reduction to this amount would strain the ability of UTHSCT to develop new and necessary programs.

Administrator's Statement

785 The University of Texas Health Science Center at Tyler

SIGNIFICANT CHANGES IN POLICY

Establishment of Doctor of Medicine Program

On February 26th, 2020, the UT System Board of Regents unanimously approved a plan to establish a Doctor of Medicine (MD) program at UTHSCT with the stated goal of increasing the physician workforce in East Texas. The program will build upon the strong educational and research programs at UTHSCT, as well as a long history of training physicians through graduate medical education and undergraduate medical education clerkships at the institution.

UTHSCT is in the early stages of the development process, which will include accreditation through the Liaison Council on Medical Education, and approval from THECB. In recognition of current economic conditions, UTHSCT is not requesting any new or additional funding for the establishment of a medical education program. However, UTHSCT respectfully requests a budget rider authorizing the institution to utilize existing funds to cover costs associated with the startup process. While UTHSCT is not requesting new funding for the establishment of the program, future formula funding will be necessary for its operation.

Administrative Realignment with UT Tyler

Building on the strong partnerships that already exist between UT Health Science Center at Tyler and UT Tyler, the two institutions are pursuing an administrative alignment to benefit students and faculty with the best opportunities to learn, teach, conduct research, and deliver health care in a fully integrated academic and medical setting. Initial steps have been taken to address accreditation with the Southern Association of Colleges and Schools Commission on Colleges and notification has been made to the Texas Higher Education Coordinating Board. The administrative alignment will not require changes to the Tyler institutions' state appropriations structures and processes. However, the leadership and organizational structure are expected to change in January 2021.

SIGNIFICANT EXTERNALITIES

COVID-19 Response and Impacts

UTHSCT has played an integral role in the response to COVID-19 in the Northeast Texas through testing, patient care, public health efforts, and research.

Testing - The Public Health Laboratory of East Texas (PHLET), a Laboratory Reference Network (LRN) facility administered by UTHSCT, has played a pivotal role in assisting local healthcare facilities and communities in the provision of lab testing for COVID-19. PHLET has provided area providers with guidelines for effective COVID testing and has processed thousands of samples from the East Texas region. Efforts are underway to increase capacity for laboratory testing in the future.

Patient Care – UTHSCT faculty physicians have led the response to COVID-19 across the UT Health East Texas system. Utilizing the advantages of an academic medical center, UTHSCT physicians have employed the most cutting-edge research and therapies to treat COVID-19 patients in East Texas.

The pandemic has also led to the enhanced provision of telehealth services at UTHSCT. This accelerated platform has enabled UTHSCT providers to conduct virtual visits with patients in the convenience of their homes, preventing potential exposure to COVID-19. This platform will continue in earnest after the pandemic has waned.

Public Health Efforts - The UTHSCT School of Community and Rural Health has contributed, and continues to contribute, to the pandemic effort through multiple avenues.

Administrator's Statement

9/16/2020 2:00:06PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

- In a project designed and led by resident physicians from the UTHSCT Occupational Health Graduate Medical Education Program, staff and volunteers retrofitted over 80,000 N95 respirators that had become unusable due to age. Once refurbished, the respirators were used in UTHSCT clinics and were distributed to community clinics unable to obtain necessary PPE.
- In conjunction with the local health department, faculty of the school produced a collaborative medical surge capacity model for the region, designed and publish a daily integrated health system dashboard specifically for COVID-19, built an online contract tracing course to train local contact tracers, and developed several online/social media health public service announcements pertaining to the pandemic.
- UTHSCT Faculty serve in the role of Public Health Authority for a 15 county region, offering critical counsel and decision making in conjunction with the local health department and DSHS.

Research - UTHSCT researchers have received numerous new federal grants related to COVID-19.

- A team of UTHSCT physicians is the testing the use of convalescent plasma in COVID-19 patients who are hospitalized. The researchers received over \$2 million out of an \$8 million National Institutes of Health (NIH) grant, with other study sites in Houston, New York, and Miami.
- Additional new grants from NIH have been obtained for the study of COVID-19 related topics, particularly related to the prevention and treatment of lung scarring in COVID-19 patients, building on decades of similar research at UTHSCT.

Financial Impacts - State and federal COVID-related funds have been vital in assisting UTHSCT to absorb both the additional costs and lost net revenue associated with the pandemic. Specifically, UTHSCT has benefited from federal CARES Act funding, directly via the Department of Health and Human Services and the Department of Education, as well as indirectly via funds passed through the Texas Hospital Association Foundation and the Texas Department of Emergency Management to Smith County, Texas.

UTHSCT has used these funds to help with the additional costs of caring for patients with a COVID-19 diagnosis, protecting employees and staff through the purchase of additional personal protective equipment serving the community through testing conducted at PHLET, and providing emergency funds for students.

FY 2022 – 23 BUDGET PRIORITIES

The following section summarizes the agency's legislative appropriations request. In recognition of current economic conditions, UTHSCT has elected not to request any new or increased funding for the FY2022-23 biennium.

Authorization to Expend Funds for the Establishment of Doctor of Medicine Program

Pursuant to direction by the UT Board of Regents to establish a Doctor of Medicine (MD) program, UTHSCT requests authorization from the legislature to expend appropriated funds to accomplish this purpose. UTHSCT is not requesting any start-up funding from the Legislature for the development of this program.

Maintain Funding for Mission Specific Formula

UTHSCT requests that the 87th Texas Legislature maintain funding for the mission specific formula that provides formula support to UTHSCT at 2020-21 levels. The 77th Texas Legislature created mission specific funding to recognize the patient care, research, and training programs at UTHSCT and the institution's designation as the State Chest Hospital.

Administrator's Statement

9/16/2020 2:00:06PM

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

Preserve Funding for Existing Non-Formula Support Items

UTHSCT receives modest, but critical, non-formula support from the Legislature. UTHSCT is the only academic medical center in the Northeast Texas region and serves an essential role to the communities in this very rural, less-populated area of Texas. UTHSCT requests that the non-formula funding that funds these programs be preserved at their existing amounts, as other resources to fund these programs are limited.

FUNDING PRIORITIES OUTSIDE UTHSCT LEGISLATIVE APPROPRIATIONS REQUEST

The following budget requests exist outside of UTHSCT's legislative appropriations request but are of particular importance to the daily operations of the institution .

Graduate Medical Education Formula

UTHSCT's GME programs in family medicine, internal medicine, occupational medicine, and psychiatry are supported by the GME formulas and related programs at the THECB. UTHSCT requests that the 87th Texas Legislature maintain funding in the various formulas that fund graduate medical education and higher education in Texas at 2020-21 levels.

Instruction & Operations Formula for Health-Related Institutions

UTHSCT requests that the 87th Texas Legislature maintain funding in the instruction and operations (I&O) formula for general academic and health-related institutions at 2020-21 levels. While these formulas provide limited direct support to UTHSCT, the institution's mission specific formula is capped at the average growth in funding for health-related institutions in the I&O formula. Because UTHSCT is a fast-growth institution, the growth in the mission specific formula typically outpaces the average growth in the health-related institution I&O formula.

Research Enhancement Formula

The research enhancement formula supports a critical mass of biomedical research at UTHSCT. The research conducted at UTHSCT is highly competitive nationally, especially in the areas of lung and infectious diseases, where the focus is on translational research. The funding provided by the research enhancement formula is leveraged to provide additional support from the federal government, non-profit organizations, and private industry.

Mental Health Funding

UTHSCT has rapidly and dramatically expanded mental health services to help the State meet the needs of Texans with mental illness, particularly those who are in the care of the state mental health hospitals or who need crisis services and have no ability to pay. These services rely on the Legislature's continued funding of mental health programs at the DSHS and the HHSC. UTHSCT fully participates as a voting member of the Statewide Behavioral Health Strategic Planning and Coordinated Expenditures Council created by Article IX, Section 10.04 of the 2016-17 general appropriations act, and stands ready as a willing partner with the State to address mental health needs in East Texas.

Facilities Needs

Acknowledging current economic conditions, UTHSCT has elected to not submit a Tuition Revenue Bond request. However, facilities needs persist as UTHSCT continues to grow. UTHSCT has developed plans to build a Health Professions Education Center to house the institution's rapidly expanding GME programs , as well as the planned Doctor of Medicine program. The building will contain classroom and medical simulation spaces, a Resident Continuity Clinic, laboratory space, a medical library, student success and wellness facilities, and faculty and administrative offices. Partial funding for this building has been secured through the Permanent University Fund, but additional sources of funding, such as a tuition revenue bond, will be required.

Administrator's Statement

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

785 The University of Texas Health Science Center at Tyler

CONCLUSION

UT Health Science Center Tyler's commitment to the Legislature is to focus educational programs on high-demand fields, collaborate with state and local agencies and private industry to solve tough problems in Northeast Texas, and manage taxpayer resources well and eliminate waste. UTHSCT's growth will be responsible and accountable with a focus on community health and health professions, clinical programs that emphasize population health and managing healthcare cost, and rapid responses to community and state needs.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The University of Texas Health Science Center at Tyler has a statutory mission to conduct research, develop diagnostic and treatment techniques, provide training and teaching programs, and provide diagnosis and treatment of inpatients and outpatients with pulmonary, respiratory, and other diseases of the chest. The Chest Disease Center Operations formula allocates funds based on the number of cases in which disease diagnoses are treated by UTHSCT. These funds are used to provide leadership and excellence in the diagnosis, treatment, and prevention of disease; and to provide primary patient care that is accessible, appropriate, effective, and compassionate.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Successful programs require adequate resources to recruit and retain talented faculty and support staff, provide state-of-the-art facilities, and maintain quality training programs. UTHSCT is committed to enhancing and identifying new sources of funding for these critical elements of its patient care mission.

FULL TIME EQUIVALENT POSITIONS:		42.6	50.9	54.5	54.5	54.5

STRATEGY DESCRIPTION AND JUSTIFICATION:

There is a critical shortage of mental health professionals in Texas, particularly in rural Texas, the state's mental health hospital system, and local mental health authorities.

This strategy helps fund the costs of a variety of mental health workforce training programs, including medical residencies in psychiatry and clinical psychology internships (the residency equivalent for psychologists), among others. The funding supports faculty positions in the Department of Psychiatry and Behavioral Medicine at multiple sites, which are required to meet Accreditation Council for Graduate Medical Education (ACGME) and other accrediting standards. The mental health workforce training program at UTHSCT is unique in that it is geared toward meeting the needs of rural and underserved areas in Texas and is collaborative in nature, with training partnerships in community mental health settings, state mental health hospital locations, and on location at The University of Texas Health Science Center at Tyler.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

------	-------------	----------	----------	----------	---------	---------

This strategy helps fund the costs UTHSCT bears in training its family medicine residents. Medical education is only partially complete when a physician is awarded his or her medical degree. Further education in an accredited residency program is essential for the development of the full range of knowledge and skills to perform medical diagnosis and treatment and the certification required before a doctor is qualified to practice. This residency education is a major part of the primary mission of all Texas medical schools. Serving the mission of training residents has significant costs, and the primary cost borne by medical schools is that of providing education by faculty.

The Family Practice Residency Program's mission is to prepare residents for the skilled practice of family medicine through patient-centered teaching from dedicated faculty in a professional academic environment, encouragement of academic excellence and the achievement of the individual resident's optimum potential, and the fostering of a healthy balance between successful living and vigorous learning.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

The poverty rate in rural Northeast Texas is higher than the state average. As a result of the high poverty rate in the area, a large number of UTHSCT's patients are indigent or self-pay patients who either don't pay their bills or pay a very minimal amount. The funds from this strategy allow UTHSCT to continue providing quality care to indigent patients while offsetting the strain on resources caused by the increase in the volume of indigent patients.

Program Prioritization: Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.

The methodology used for program prioritization is optimization of resources dedicated to address UTHSCT's mission critical programs and infrastructure needed to continue daily operations. These programs support advancements and improvements in patient care, research, and education.

The Public Health Lab of East Texas (PHLET) is an extension of the Texas Department of State Health Services Bureau of Laboratories. PHLET provides testing services for the Public Health Region 4/5N. The PHLET facility is located on the campus of The University of Texas Health Science Center at Tyler, Texas. Funds have been used to convert the Camp Fannin Army Base laundry facility into a state of the art Public Health Laboratory. PHLET is a registered Laboratory Response Network (LRN) facility that offers public health laboratory services as well as bioterrorism confirmation testing.

NO FUNDS WERE PASSED THROUGH TO LOCAL ENTITIES**NO FUNDS WERE PASSED THROUGH TO OTHER STATE AGENCIES OR INSTITUTIONS OF HIGHER EDUCATION****USE OF HOMELAND SECURITY FUNDS**

UTHSCT is serving East Texas during the COVID-19 crisis through direct patient care, serving as a COVID-19 testing site, researching treatments and cures, providing public health expertise, and collaborating with our clinical partner, UT Health East Texas, to ensure that the citizens of East Texas receive the best care possible in this time of great need. State and federal COVID-related funds have been vital in assisting UTHSCT to absorb both the additional costs and lost net revenue associated with the pandemic. Specifically, UTHSCT has benefited from federal CARES Act funding, directly via the Department of Health and Human Services and the Department of Education, as well as indirectly via funds passed through the Texas Hospital Association Foundation and the Texas Department of Emergency Management to Smith County, Texas.

UTHSCT has used these funds to help with the additional costs of caring for patients with a COVID-19 diagnosis, protecting employees and staff through the purchase of additional personal protective equipment serving the community through testing in our public health lab, and providing emergency funds for students. In addition to the expenditures listed below, UTHSCT has allocated \$804,466 to offset lost patient revenue as a result of fewer patients seeking care in the months of March, April, and May.

Family Practice Residency Training

(1) Year Non-Formula Support Item First Funded:	1985
Year Non-Formula Support Item Established:	1985
Original Appropriation:	\$150,000

(2) Mission:

This strategy helps fund the costs UTHSCT bears in training its family medicine residents. Medical education is only partially complete when a physician is awarded his or her medical degree. Further education in an accredited residency program is essential for the development of the full range of knowledge and skills to perform medical diagnosis and treatment and the certification required before a doctor is qualified to practice. This residency education is a major part of the primary mission of all Texas medical schools. Serving the mission of training residents has significant costs, and the primary cost borne by medical schools is that of providing education by faculty.

The Family Practice Residency Program's mission is to prepare residents for the skilled practice of family medicine through patient-centered teaching from dedicated faculty in a professional academic environment, encouragement of academic excellence and the achievement of the individual resident's optimum potential, and the fostering of a healthy balance between successful living and vigorous learning.

(3) (a) Major Accomplishments to Date:

- a. Since its inception in 1985, the Family Medicine Residency Training Program of the University of Texas Health Science Center Tyler has graduated 218 family physicians in 33 graduating classes. Of the 218 graduates, 159 have remained in Texas to practice primary care and over 125 of those have remained in East Texas.
- b. The Family Medicine Residency Training Program at UTHSCT continues to enjoy a reputation as a premier training program in Texas. Because of the excellent teaching faculty and state of the art facilities, the program is consistently able to attract highly ranked medical residents from medical schools in Texas and surrounding states.
- c. UTHSCT added a Rural Family Medicine Residency Program and the program received initial accreditation from the ACGME in April 2016, for a full resident complement of 6 residents. This program will increase the rural physician workforce in underserved Texas communities.
- d. In addition to the residents in its own program, the Family Medicine Residency Program at UTHSCT is training residents in their first residency year from the Rural Family Medicine Residency Program and medical students from UTMB Health completing their third year clerkships and UT Southwestern medical students, and providing primary care rotations for residents in the UTHSCT Psychiatry Residency Program.
- e. The Family Practice Residency Training Program has partnered with UT Tyler - School of Pharmacy to provide integrated care for clinic patients.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

785 The University of Texas Health Science Center at Tyler

- a. To continue to help train Family Medicine residents and supply the people of Texas and East Texas with the best in primary health care.
- b. UTHSCT received ACGME initial accreditation effective July 1, 2019, to start training in a new family medicine residency training program in Athens, Texas, for a full complement of 12 family medicine residents. The first class of 4 residents will begin July 1, 2021.
- c. Increased teaching of medical students from UT Southwestern and UTMB Health.
- d. Increased integration and cooperation with the psychiatry, internal medicine, and occupational medicine GME programs at UTHSCT.
- e. Improve mental health related learning and patient care by developing mental health "TRIADS" composed of family medicine residents, psychiatry residents, and psychology interns.
- f. Continued expansion of learning opportunities for family medicine residents through new rotations within the UT Health East Texas organization.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

This special item does not receive formula funding.

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

Significant primary care workforce shortages exist in Texas, and in northeast Texas particularly. In some communities, there are no primary care providers, particularly in rural areas. Without funding for the family medicine residency programs, Texas will have fewer family medicine physicians available to provide primary and preventive care.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

The University of Texas Health Science Center Tyler would like to see the funding for the Family Medicine Residency Training continue on a permanent basis, so that we may continue to train and graduate quality Family Medicine physicians who will serve the healthcare needs of Texas residents.

(11) Non-Formula Support Associated with Time Frame:

N/A

785 The University of Texas Health Science Center at Tyler

(12) Benchmarks:

N/A

(13) Performance Reviews:

UTHSCT's Family Medicine Residency Training Program has a number of existing performance measures, including the number of residents who remain in Texas (73% since the program's inception) and 59% of those graduates remain in East Texas. The program also consistently fills all of its matches and graduates 7-9 residents per year.

785 The University of Texas Health Science Center at Tyler

Institutional Enhancement (Academic & Student Support)

(1) Year Non-Formula Support Item First Funded: 2000
Year Non-Formula Support Item Established: 2000
Original Appropriation: \$1,000,000

(2) Mission:

The mission is to improve the facility on health and safety projects, and to support the necessary academic and student support areas of the new building for UTHSCT's School of Community and Rural Health (SCRH). This School is focused on degree programs to train students who will become the workforce to meet the public health needs in rural Texas.

(3) (a) Major Accomplishments to Date:

Funds have been used to improve the facility, including projects that improved the health and safety features of the property. Funds were used to revitalize the UTHSCT Public Health Clinic and renovate of high traffic areas on the first floor of the patient care and administration towers. More recently, the funds have been used to support the growth of the School of Community and Rural Health via equipping the necessary academic and student support areas of UTHSCT's new building for the SCRH.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

The funds from the Institutional Enhancement strategy will be used to provide additional technology and equipment for the students, faculty, and staff of the School of Community and Rural Health as the School continues to grow and offer new degree programs. This School is focused on degree programs to train students who will become the workforce to meet the public health needs in rural Texas.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Locally generated hospital revenue

(5) Formula Funding:

This special item does not receive formula funding.

(6) Category:

Institutional Enhancement

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

785 The University of Texas Health Science Center at Tyler

(9) Impact of Not Funding:

A reduction in these funds would result in a delay in equipping portions of the student support areas and some of the academic areas with the necessary technology and equipment needed as the degree programs increase and are added to make them functionally useful. Reduced funding may result in deferred maintenance of existing infrastructure. This deferred maintenance must eventually be "caught up" and typically results in higher costs at later dates due to compounded damage caused by natural elements and normal "wear and tear."

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

The University of Texas Health Science Center at Tyler would like to see the funding for Institutional Enhancement continue on a permanent basis. This funding is used to improve the health and safety features of the property.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UTHSCT uses the Institutional Enhancement funds on numerous campus improvement projects and to improve the health and safety features of the property. Funds have been used to revitalize the UTHSCT Public Health Clinic, and to renovate high traffic areas on the first floor of the patient care and administration towers, which had not been updated since the 1970s.

785 The University of Texas Health Science Center at Tyler

Mental Health Training Programs

(1) Year Non-Formula Support Item First Funded:	2016
Year Non-Formula Support Item Established:	2016
Original Appropriation:	\$4,000,000

(2) Mission:

Texas has a critical shortage of mental health professionals, particularly in rural Texas, the state's mental health hospital system, and local mental health authorities. This item helps fund a variety of mental health workforce training programs, including medical residencies in psychiatry and clinical psychology internships (the residency equivalent for psychologists), among others. The funding supports faculty positions in the Department of Psychiatry and Behavioral Medicine at multiple sites, which are required to meet Accreditation Council for Graduate Medical Education (ACGME) and other accrediting standards. The mental health workforce training program at UTHSCT is unique in that it is geared toward meeting the needs of rural and underserved areas in Texas and is collaborative in nature, with training partnerships in community mental health settings, state mental health hospital locations, and on location at The University of Texas Health Science Center at Tyler. Following the 86th Legislature, this funding has been used to create a mental health workforce training program specifically targeted at training mental health professionals to identify and better treat victims of child abuse. The programs has trained professionals and students in clinics, higher education institutes, and community advocacy groups across the state, and continues to expand despite challenges brought on by the COVID-19 pandemic.

(3) (a) Major Accomplishments to Date:

- a. The psychiatry faculty has expanded to 12, with 4 being credentialed in child psychiatry. This expansion has increased access to mental health services for adults and youth.
- b. UTHSCT received an initial accreditation award by ACGME on April 29, 2016, for a full resident complement of 24 psychiatry residents. The first resident match took place in spring 2017. A full complement of 4 classes of 6 residents each have started as of July 2020.
- c. The psychology faculty has expanded to 5 full-time psychologists.
- d. The psychology internship program trains doctoral interns in health service psychology, focusing on the underserved in an integrated behavioral health context. The program was granted APPIC membership in 2015 and accredited by the APA in October 2016.
- e. The inaugural internship class of 4 began in June 2015. The class size has increased to the current level of 10. A post-doctoral training opportunity was developed in 2016; four fellows have completed the program to date.
- f. Areas of service have grown: interns work with resident and faculty physicians, medical students, pharmacists, pharmacy students, and nurses in Family Medicine, Hospital, Palliative Care, Oncology, Internal Medicine, and Emergency Medicine. Interns train in adult, child and adolescent psychotherapy and assessment: pain, pre-surgical and neuropsychological. Training affiliations are active with Rusk and Terrell State Hospitals. Interns also supervise practicum students at UT Tyler.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

- a. The first class of 6 psychiatry residents will graduate in June 2021.
- b. Anticipating ACGME site visit for continued accreditation in 2022.
- c. Expansion of the training program to include additional post-doctoral fellows.
- d. UTHSCT received ACGME initial accreditation effective April 24, 2020, to start training in a rural psychiatry residency program in Pittsburg, Texas, for a full complement of 16 psychiatry residents. The first class of 4 residents will begin July 1, 2021.

785 The University of Texas Health Science Center at Tyler

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

None

(5) Formula Funding:

This special item does not receive formula funding.

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

(9) Impact of Not Funding:

An estimated 85,000 individuals in Northeast Texas have a serious mental illness. Over 85% of counties in the region have a shortage of mental health providers. In some communities the ratio of mental health providers to patients is nearly 25,000 to 1, seven times worse than the state average. There is an even greater shortage of child/adolescent psychiatrists and geriatric psychiatrists. Over 55% of psychiatrists are over the age of 55 and are likely to retire in the near future. If the Mental Health Training Program is not funded these gaps will continue to widen resulting in thousands of those with mental illness unable to receive appropriate treatment. Without appropriate treatment, many will receive help only in crisis, if at all, continuing to place undue burden on Emergency Departments and the Criminal Justice System, and potentially escalating a suicide rate that is already 43% above the state average.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:

UTHSCT would like to see the Mental Health Training Programs funded on a permanent basis. In Northeast Texas, there are increasing numbers of citizens suffering from mental health illnesses, and there are not enough trained mental health professionals. The suicide rate in Northeast Texas is 43% higher than the Texas average, and without additional providers, this rate will probably increase. UTHSCT seeks to be a part of the solution to the mental health epidemic by training psychiatry residents and psychology interns and provide the people of Texas and East Texas with highly trained mental health professionals. It is notable that approximately 73 percent of the family medicine residents trained at UTHSCT remain in Texas, and over half of those stay in rural Texas, so it is likely that some of these psychiatry residents and psychology interns will remain in East Texas when they graduate. The psychiatry residency program lasts 4 years, and no other funding exists to sustain these slots.

(11) Non-Formula Support Associated with Time Frame:

N/A

785 The University of Texas Health Science Center at Tyler

(12) Benchmarks:

N/A

(13) Performance Reviews:

Since its inception, the Mental Health Training Programs have consistently filled all available resident, intern, and post-doctoral fellow positions, and has already graduated 5 classes of psychology interns and 4 post-doctoral fellows. Both programs have received accreditation, and continue to grow and positively impact the Texas community by treating and helping citizens with mental health disorders.

785 The University of Texas Health Science Center at Tyler

Support for Indigent Care

(1) Year Non-Formula Support Item First Funded:	2002
Year Non-Formula Support Item Established:	2002
Original Appropriation:	\$1,500,000

(2) Mission:

The poverty rate in rural Northeast Texas is higher than the state average. As a result of the high poverty rate in the area, a large number of UTHSCT's patients are indigent or self-pay patients who either don't pay their bills or pay a very minimal amount. The mission is to allow UTHSCT to continue providing quality care to indigent patients while offsetting the strain on resources caused by the increase in the volume of indigent patients.

(3) (a) Major Accomplishments to Date:

The University of Texas Health Science Center at Tyler provides over \$80 million per year in uncompensated care costs to patients who otherwise cannot afford medical care or insurance coverage or are underinsured. Uncompensated care costs also include the unreimbursed costs from government-sponsored health programs. A portion of these uncompensated care costs are dedicated to provide charity care to patients who apply for financial assistance according to The University of Texas Health Science Center at Tyler's charity care policy. Support for Indigent Care has been used to partially offset the costs incurred to provide essential care to these eligible patients.

(3) (b) Major Accomplishments Expected During the Next 2 Years:

To provide a responsible amount of charity health care, within the constraints of The University of Texas Health Science Center at Tyler's finite resources, in order to improve the health of indigent patients in the region.

(4) Funding Source Prior to Receiving Non-Formula Support Funding:

Locally generated hospital revenue

(5) Formula Funding:

This special item does not receive formula funding.

(6) Category:

Healthcare Support

(7) Transitional Funding:

N

(8) Non-General Revenue Sources of Funding:

None

785 The University of Texas Health Science Center at Tyler

(9) Impact of Not Funding:

Reduced healthcare access to patient who do not have the ability to pay for services.

(10) Non-Formula Support Needed on Permanent Basis/Discontinuu

The University of Texas Health Science Center at Tyler would like to see the funding for Support for Indigent Care continued on a permanent basis so that we may maintain our assistance to low-income patients with financial assistance for their health-care expenses.

(11) Non-Formula Support Associated with Time Frame:

N/A

(12) Benchmarks:

N/A

(13) Performance Reviews:

UTHSCT currently provides over \$80 million per year in uncompensated care to uninsured, underinsured, or indigent patients.
