

PROMISE+

AND OTHER CRITICAL INVESTMENTS

\$3M

Regents commit \$300 million in **Promise+** funds to expand college affordability and access at UT academic institutions. UTSA will receive \$3 million in the first year alone, making it possible for hundreds more students whose families make less than \$70,000 to have their entire tuition covered.

\$28M

\$28 million over the last decade to fund critical campus infrastructure such as major upgrades and repairs to buildings, the purchase of lab equipment, and the addition of new technology.

\$114M

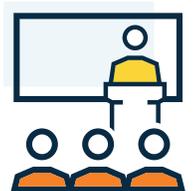

\$114 million in PUF funding over the last decade toward facilities to support education and research at UTSA, including:

- Construction of the School of Data Science & National Security Collaboration Center, to help achieve UTSA's goal of educating and training 1 million new cyber workers.
- Restoration of the Main Building to support an enhanced learning and working environment for students, staff and faculty.
- Construction of the Applied Engineering & Technology Building to support world-class research and teaching in science and engineering.
- Construction of the North Paseo Building to accommodate a growing student body and research enterprise with new classrooms, labs and administrative offices.
- Construction of the Science & Engineering Building to provide instructional and research labs and classrooms for brain health, engineering, biology and chemistry programs.

\$22.5M

\$22.5 million over the last decade to recruit and retain almost 50 notable UTSA faculty members through the Regents' successful STARs (Science and Technology Acquisition and Retention) program. STAR recipients have generated additional research grants and support for UTSA that amount to more than 10 times the Regents' initial investment.

\$122M

\$122 million from the Texas Legislature in capital construction assistance projects for UTSA's Science & Engineering Building and the Innovation, Entrepreneurship & Careers Building.
