**Adjourn** 11:20 a.m.
1. **U. T. System Board of Regents: Discussion and appropriate action regarding Consent Agenda items, if any, assigned for Committee consideration**

**RECOMMENDATION**

No Consent Agenda items are assigned for review by this Committee.
2. U. T. Rio Grande Valley: School of Medicine Vivarium and Office Building - Amendment of the current Capital Improvement Program to include project

RECOMMENDATION

The Chancellor concurs in the recommendation of the Executive Vice Chancellor for Academic Affairs, the Executive Vice Chancellor for Business Affairs, and the institutional president that the U. T. System Board of Regents amend the current Capital Improvement Program (CIP) to include the School of Medicine Vivarium and Office Building project at The University of Texas Rio Grande Valley.

BACKGROUND INFORMATION

Previous Actions

On January 22, 2021, the Chancellor approved this project for Definition Phase. On November 14, 2019, the Board approved $8,920,000 of Permanent University Fund (PUF) Bond Proceeds for this project.

Project Description

The UTRGV School of Medicine has experienced rapid growth across the clinical, academic, and research missions. The Department of Human Genetics, established in 2017, has faculty on both the Edinburg and Brownsville campuses. The offices for the faculty based in Brownsville are in a modular building that was placed on the campus in 2015. New offices that are proximate to the laboratories and an expansion of laboratory space are urgently needed to facilitate the conduct of research supported by multiple National Institutes of Health grants.

The proposed building will be located on the northern section of the Brownsville campus and will house faculty and administrative offices, a state-of-the-art vivarium, a laboratory, an MRI suite with exam rooms, offices, and associated labs. Currently all imaging is conducted in San Antonio due to the lack of a dedicated research imaging facility in the Rio Grande Valley. Grant funding provided by the Valley Baptist Legacy Foundation will support construction of the MRI suite. This facility will allow dramatic expansion of research in imaging genomics and associated funding for imaging genomics.

This proposed project has been approved by U. T. System staff and meets the criteria for inclusion in the CIP. As this project was underway as an institutionally managed minor project, it has been determined that this project remain managed by UTRGV Facilities Management personnel who have the experience and capability to manage all aspects of the work. Approval of design development plans and authorization of expenditure of funding will be presented to the Board for approval at a later date.

The University of Texas Rio Grande Valley
School of Medicine Vivarium and Office Building
(continued)

Investment Metrics

- Increase research space for School of Medicine by 2022
- Develop laboratories by function rather than investigator to enhance departmental research programs, by 2022

Project Planning

- Definition Phase Completed: Yes
- Owner’s Project Requirements: Yes
- Basis of Design: Yes
- Schematic Design: Yes
- Detailed Cost Estimate: Yes

Project Milestones

- Definition Phase Approval: January 2021
- Addition to CIP: February 2021
- Design Development Approval: May 2021
- Construction Notice to Proceed: June 2021
- Substantial Completion: July 2022

Basis of Design

The planned building life expectancy includes the following elements:

- Enclosure: 50 years
- Building Systems: 25 years
- Interior Construction: 20 years
RECOMMENDATION

The Chancellor concurs in the recommendation of the Executive Vice Chancellor for Health Affairs, the Executive Vice Chancellor Academic Affairs, the Executive Vice Chancellor for Business Affairs, and the institutional presidents that the U. T. System Board of Regents amend the current Capital Improvement Program (CIP) to include the Biomedical Engineering and Sciences Building project at The University of Texas Southwestern Medical Center.

BACKGROUND INFORMATION

Previous Actions

On September 16, 2020, the Chancellor approved this project for Definition Phase. On November 14, 2019, the Board approved $90,000,000 in Permanent University Fund (PUF) Bond Proceeds for the joint Translational Biomedical Engineering and Sciences Building project between The University of Texas Southwestern Medical Center and The University of Texas at Dallas.

Project Description

Recent and previously unimaginable advances in bioengineering have been limited by the need to translate biomedical technologies from the idea stage to improved treatment for millions of patients. A critical element to advancing this vision is a well-designed and centralized facility to optimally connect engineers with physicians and patients, accelerating the advancement of medical technologies, training, and education for students. The University of Texas Southwestern Medical Center (UTSWMC) and The University of Texas at Dallas (UTD), leveraging research strengths in basic and applied biomedical and engineering sciences, propose to expand their partnership from research to real-world applications, and achieve the synergy necessary to realize the potential of a premier joint department of biomedical engineering.

The proposed joint UTSWMC/UTD Biomedical Engineering and Sciences Building would solve the need for proximity between physician and engineering researchers and provide essential access to a patient population. A specialized facility would provide space for effective collaboration, including labs designed for equipment development and testing; research bench space; interactive office space for informaticists and software developers; patient space to allow for assessment of research participants and translational trials; shared support space ranging from conferencing rooms to device fabrication shops; and potential co-location of imaging equipment and services. This five-story building located on the UTSWMC campus, will include administrative space on the first floor, while the second through fifth floors will be dedicated to research lab space that will be programmed for multiple principal investigators. Surface parking is also included in the project.
This proposed project has been approved by U. T. System staff and meets the criteria for inclusion in the CIP. Approval of design development plans and authorization of expenditure of funding will be presented to the Board for approval at a later date. Pursuant to a Memorandum of Understanding effective September 1, 2016, U. T. Southwestern Medical Center has delegated authority of institutional management of construction projects under the continued oversight of the Office of Capital Projects.
