The Alpine Women's Center is a nonprofit organization which provides shelter via a "safe" environment and counseling for women and children who are victims of domestic violence. Over the past two years, the Alpine Women's Center has enjoyed considerable success in developing activities to strengthen families experiencing discord, abuse and neglect. In addition, the center focuses on individual and group counseling and collaborates with an extensive network of community agencies in the region to provide follow-up services. The Center will seek to develop outreach services to those women and children who are victims of domestic violence and in need of assistance in Brewster, Jeff Davis, Pecos, Terrell, and Presidio counties. Intervention, residential, and counseling services will be provided to families experiencing psychological trauma as a result of sexual abuse, rape, neglect and violence in domestic situations. In addition, the Center offers sessions in parent-effectiveness training, self-reliance, money management and budgeting, family planning, career and educational options, building self-esteem, legal aid, and the like.

Ms. Janice Harvey, the director of the Alpine Women's Center, is responsible for the administration of the program.

They will be evaluated comprehensively by an interdisciplinary team at 3 years, 4½-5 years, and 6-6½ years. At each age, parents will be educated concerning any weaknesses or deficiencies and specific community-based remediation will be recommended. The proposed demonstration project has two purposes: first, 65 children will be assessed in the areas of fine motor development, speech/language development, and psychologic functioning before entering formal school. An instrument battery designed to detect the precursors of the actual learning disability/ attentional disorder at the earliest possible age will be used. The second purpose of the project is to determine for each age group the most cost and time effective methods for detecting such deficiencies in the future.

Dr. Murdina Desmond, M.D., of Baylor College of Medicine will be responsible for administration of the project.

The present grant will focus on collecting and analyzing data on approximately 35 families from each of the three ethnic groups to be studied during the first year of this project. Assuming successful completion of the initial research phase, the Hogg Foundation will recommend a grant for support the second year to collect data on three new groups of families in which the oldest child will enter first grade.

Determining the complex nature of endorphine functioning in the central nervous system, particularly as it relates to various types of chronic pain and the extent to which such pain may be successfully treated by acupuncture or biofeedback methods, is an important goal which hopefully can be achieved in the coming year. Chronic pain syndromes are a major problem in the field of mental health, often being associated with psychological syndrome needs to be properly tested by the kind of experimental design to be employed this coming year.

Dr. Kiser is responsible for the administration of this project.

Study of Mental Health Among the "Snowbird" Population in the Rio Grande Valley - \$4,140

The Hogg Foundation Executive Committee wishes to recommend approval of a grant to enable Drs. Robert L. Leon, Sue Hoppe, and Harry Martin to obtain data on samples of annual migrants from the north who spend the winter months in the lower valley. Using volunteers among the Snowbirds as interviewers will allow for the collection of data at a relatively low cost and will provide useful activity for some of the northern migrants who are well-motivated and have appropriate aptitude. The major goal of the project is to provide an accurate estimate of the prevalence of mental illness and the level of mental health among residents of the Snowbird community in the lower valley.

Dr. Leon is responsible for the administration of this project.
