advances in the treatment of cancer and the number of children surviving this disease has increased dramatically. Many of the treatments, including surgery, radiation, and chemotherapy, create devastating secondary effects for these children, including disfigurement, learning disabilities and emotional maladjustment. The children also suffer from the psychosocial aspects of the treatment. This innovative program will address many of these problems by creating an environment as normal as possible for these children during their treatment. Dr. Jan van Eys, Head of the division of Pediatrics, will be responsible for the administration of the grant.

An Exploratory Study of Black Families in Two Texas Communities: Their World Views and Mental Health - \$26,315

The Executive Committee of the Hogg Foundation recommends for approval a research grant for the period December 1, 1984 to November 30, 1985. The proposed research project is designed to examine the role of the family, extended kin, and other primary group relationships as resources in the stressful life events and buffers against mental disorders in Black couple-headed households. The role of sociocultural world views, social network, and social supports will be assessed in order to determine their effects on these Black families' coping strategies and patterns. It is expected that this study will generate knowledge useful for social policy development and social interventions for mental health service providers. Dr. Richard A. English, Robert L. Sutherland Professor of Mental Health and Social Policy in the School of Social Work, will be the principal investigator responsible for administration of the project.

The complete text of the changes can be found in Documents and Proceedings of the University Council, pages 9848-9849, 9669-9670, 9676-9677, 9685, 9689-9694, 9810-9811, and Documents and Minutes of the General Faculty, pages 15167-15175.

College of Communication Bulletin for 1983-85

<u>Current bulletin page number</u>	<u>Summary of Proposed Change</u>
18	For the Bachelor of Journalism degree, the title of one of the required areas of concentration is changed from Radio-Television News to Broadcast News. Course requirements for the Broadcast News sequence are redefined in part by deleting some required semester hours in Radio-Television-Film and substituting Journalism courses involving pertinent areas of broadcast news. There is no change in either the total number of semester hours required for the degree or the total number of required semester hours in College of Communication courses.

College of Fine Arts Bulletin for 1983-85

<u>Current bulletin page number</u>	<u>Summary of Proposed Change</u>
31-32	For the Bachelor of Fine Arts degree, Drama Production major, the previously separate concentrations in Costume and Technical Production are assimilated into one concentration called Design and Technology. The Dance concentration is deleted. The first two years of the program are restructured to provide students a sequence of drama courses taught in an integrated manner by faculty in several areas of the department and to allow progress in completion of basic education requirements. New courses in drama academics and skills are added to the curriculum. The total number of semester hours required for the degree is increased by four.
33	For the Bachelor of Fine Arts degree, Dance major, modern dance and ballet are identified as the foundation techniques of the program. New required courses in dance academics, i.e., Dance History, replace drama academics, i.e., Theatre History.

CATALOGUE CHANGES (continued)

- The program more clearly distinguishes between students intent upon pursuing a performing career and those who wish to study dance within the wider context of the liberal arts and sciences. The total number of semester hours required for the degree is increased by ten, although this includes the Rehearsal and Performance requirements for which semester hours currently are not earned.
- 35-36 For the Bachelor of Music degree, the Applied Church Music major is deleted. The last enrollment in the program was in 1969.
- 35 For the Bachelor of Music degree, Applied Orchestral Instruments major, a concentration in jazz studies is added. Course requirements are redefined in part by a change in the basic piano proficiency requirement and the structure of some courses. Baritone is included among the instruments accepted for the major. The range of the total number of semester hours required for the degree increases by one.
- 36-37 For the Bachelor of Music, Music Theory or Composition major, the music theory program is separated from the composition program. For composition majors, a jazz studies concentration is added. Course requirements are redefined in part by the addition of a course requiring a senior paper in music theory and by the restructuring of some courses. The range of the total number of semester hours required for the degree increases by two.

College of Liberal Arts Bulletin for 1983-1985

<u>Current bulletin page number</u>	<u>Summary of Proposed Change</u>
27-28	For the Bachelor of Arts, Plan I, revisions are made in regard to the number of semester hours required for the degree which may be taken on a Pass-Fail basis. The current catalogue provides that a maximum of sixteen semester hours of classroom work may be taken on a Pass-Fail basis. This statement is moved in the catalogue to the paragraph which summarizes degree requirements. It also is modified to provide that for the courses required for the degree, a maximum of sixteen semester hours of classroom and/or correspondence credit may be taken on a Pass-Fail basis.

General Information Bulletin for 1983-1985

<u>Current bulletin page number</u>	<u>Summary of Proposed Change</u>
90-93	<p>The Table of Scholastic Standards For Continuance In The University is amended to require that students on scholastic probation achieve a higher UT Austin grade point average than is now required in order to continue in The University. The "two-semester rule" is abolished because it is no longer needed due to the stricter academic standards for continuance. The policy which provides that a student will not be placed on scholastic dismissal at the end of a summer session is amended slightly. A student may be scholastically dismissed at the end of a summer session if that student's academic dean places the possibility of such dismissal as a condition precedent to allowing a student subject to scholastic dismissal to continue in The University during the summer session.</p>

Under terms of the Department of Defense Industrial Security Manual for Safeguarding Information, which is applicable to the above-named contracts, the Contractor (University) may not retain classified material beyond the time required by the "Records" clause of the contract. Under the "Records" clause, the University is required to maintain its fiscal contract records for a period of three years after final payment under the contract, after which the Government is precluded from further audit. The Office of Accounting at The University of Texas at Austin retains fiscal records (none of which is classified) and advises there is no objection to the deletion of any classified portion from the contracts. It is now necessary to delete those classified sections of the contract which primarily describe the technical work that was performed and any related classified material in the contract file. It is recommended that the Board of Regents authorize deletion of classified portions of the above nineteen contracts held by the Office of Sponsored Projects as the System Security Office.

ABSENCES FROM USUAL AND REGULAR DUTIES, INCLUDING TRAVEL AND REASSIGNMENT OF DUTIESHOUSTON MEDICAL SCHOOL

1. Ian Butler, M.D., Professor, Department of Neurology, to travel to London, England for the period beginning April 15, 1985 through October 18, 1985. This period of research investigation in an established internationally recognized laboratory will provide an opportunity for Dr. Butler to gain new skills in neurotransmitter analysis, animal models and in memory functions, which promise to enhance his already considerable skills in that area, but which will further augment the stature of the Department of Neurology and of the Medical School by increasing his effectiveness as a teacher, investigator and leader. Dr. Butler will expand his research activities by working with Professor C. D. Marsden, Professor of Neurology at the Institute of Psychiatry in London, who is internationally recognized in movement disorders. Dr. Butler will continue to receive his full salary from State and Designated funds for the period of this reassignment. His travel expenses will be paid from Designated funds.

2. Ruby N. Isom, Ph.D., Associate Professor, Department of Family Practice and Community Medicine, to travel to San Diego, California for the period beginning February 15, 1985 through August 15, 1985 for a reassignment of duties. Her main base of operation will be the School of Public Health at San Diego State University with adjunctive assignments with the preventive medicine program at the University of California Medical School at LaJolla. First priority has been given to gaining experience in an accredited and operational preventive medicine residency training program that is similar in structure and design to the program intended for development at the Medical School in cooperation with our School of Public Health. Dr. Isom will have the opportunity to work with the Director of the Student Health Service to expand and evaluate the health promotion aspects of that program which will serve as another experience of potential value to the School and Health Science Center. In addition, she will be teaching at least two courses in marketing and communications. Dr. Isom will continue to receive her full salary from State funds for the period of this reassignment. The travel will be at no cost to the University.
