

**Fisher Scientific and Possible Missions**  
**Partnering to serve**  
**The University of Texas System Supply Chain Alliance**

**2010 The Fisher and Possible Missions Partnership**

Possible Missions answers the call for a Fisher Scientific Inventory Management RFP serving Galveston, Houston and Austin. Possible Missions wins the award, and the partnership begins.

**2013 Expansion**

After three years of building a solid relationship, Possible Missions joins Fisher Scientific as HUB Partner for the new UT Alliance Agreement. Possible Missions' HUB services start with one Texas System campus and grows. Possible Missions expands solutions offering to include services such as dock delivery, desktop delivery, and concierge services. In addition to a full customer service team, Possible Missions adds procurement services, ecommerce support, order management, accounts receivables, and sales.

Working closely together allows Fisher Scientific and Possible Missions to understand each other's businesses and to enhance the quality and suitability of their solutions for UT Alliance customers. The bond between the two companies now supports the UT Alliance client base across the state of Texas.

**The University of Texas System Supply Chain Alliance Recognition**

**2017**  
 UT System Supply Chain Alliance awards Possible Missions HUB Supplier of the Year

**2019**  
 Possible Missions named HUB Advocate of the Year

**2020**  
 Fisher Scientific named Supplier of the Year

**2021**  
 Fisher Scientific / Possible Missions Partnership recognized as Pandemic Partner Award honoree for exceeding expectations of delivering value and service during the Covid-19 Pandemic

*“These acknowledgements for both Fisher Scientific and Possible Missions demonstrate how our strategic alliance is valued and, more importantly, how our combined efforts deliver the best customer outcomes even in the most challenging conditions. By maintaining continuous communication among logistics teams, manufacturers and customers, the two firms are able to maximize results and deliver the products and services needed effectively and efficiently, even during a real-time crisis. Our partnership has allowed us to evolve with each stage of the recent pandemic to address everything from safety shield assembly to COVID test kit packets.”*

**– Paula Mendoza, Owner and CEO, Possible Missions**

**New Opportunities**

As a result of the pandemic, the need for an offsite inventory/storage facility became evident. Possible Missions has since purchased a facility to accommodate the need to support local current and future growth.

We eagerly anticipate an even stronger and enduring relationship as a joint Fisher Scientific / Possible Missions team, to serve The University of Texas System for years to come.
