UT SYSTEM
PRODUCTIVITY
DASHBOARD

UT System’s Productivity Dashboard is an online business intelligence tool that provides current data, trends over time, and benchmarking for metrics across institutional mission areas. It facilitates information sharing and puts data at the fingertips of decision makers.

A national model for open access and transparency in higher education, the Dashboard offers easy access to trend data on more than 70 metrics, including 10 core indicators that track progress in major strategic areas.

Data When You Need It
Skim the surface or dig deep. Whether you need a quick stat about an institution or you are conducting a detailed trend analysis about all the campuses, the UT System Productivity Dashboard has the data you need anytime, anywhere.
